

## CRM Bibliographies

Many archaeologists in the state have commented on the difficulty in accessing the gray literature of CRM projects. In particular, consulting completed Phase II and Phase III projects, is crucial for developing contexts which enable us to evaluate the potential significance of sites. In the best of all worlds we would have annotated bibliographies of all Phase II and Phase III reports, but in an effort to at least provide a beginning for such a daunting project, I have compiled the titles of projects containing Archaic Period sites tested or mitigated in northern Illinois (through September 2003) and the titles of projects containing Historic Period sites tested or mitigated by MARS, Inc. Most project titles include site numbers, and county and township information. If you have any questions about the MARS reports call (815) 568-0680. I encourage other IAS members to add to these titles and to start lists for other time periods and other areas of the state. Working together we can fill an important void in our knowledge.
